SUMMARY

P67 ASSESSMENT VISIT – Moldova

Performed under EU CBRN CoE Project 67 ‘Strengthening CBRN Waste Management Capabilities in South-East and Eastern European Countries’

During 28 – 29 March 2019, the European Union P67 implementation consortium conducted an Assessment Visit to Moldova as part of the activities under work package 1 (Inventory of CBRN Waste Management existing legislation, regulations, practices, including capabilities of waste operational infrastructure and training needs).

The visit was coordinated with the National Focal Point, V. Palii, Ministry of Foreign Affairs of Moldova and supported by representatives from the Ministry of Agriculture, Regional Development and Environment, Agency for Regulation of Nuclear and Radiological Activities, National Public Health Agency, and Security and Intelligence Service. P67 consortium was represented by the P67 Key-Experts (Team Leader, H. Visser, Chemical Waste Management, F. Coulon, Biological Waste Management, T. Pottage, and Radioactive Waste Management, P. Salzer).

An introductory meeting was conducted at the Ministry of Agriculture, Regional Development and Environment, to discuss the general Chemical, Biological and Radioactive Waste Management issues in Moldova. Legislative expert, Y. Balci, connected remotely to discuss the legislative framework for waste management in Moldova. To assess practical aspects of waste management in Moldova several site visits were conducted by P67 Consortium and local experts during the two days of the assessment visit.

To discuss biological waste management issues the Sites visited the Clinical Republican Hospital, Mother and Child Hospital, the Public Health Laboratory, National Agency for Public Sanitation, as well as, the waste treatment facility ‘Ecostat’ SRL. While a meeting with the representatives from the Ministry of Agriculture, Regional Development and Environment was held to discuss chemical waste management issues. For Radiological waste management issues, a meeting was conducted with representatives of the Agency for Regulation of Nuclear and Radiological Activities and a visit to the central storage facility was conducted.
